AYESHA KHALIQ

Full Stack Web Developer | Android Developer

ayeshakhaliq265@gmail.com | (+92) 3344921050 | LinkedIn | GitHub

SUMMARY

Computer Science graduate (BS, 2026) with hands-on experience building Full-stack web applications and native Android apps end-to-end, from design and development through testing and deployment. Proficient in React.js, Node.js, Express.js, and Kotlin, with practical exposure to Firebase and MongoDB. Delivered a complete Android application independently for a final year project, integrating real-time data, authentication, and location-based alerts, in addition to independently designed, built, and deployed a complete full-stack e-commerce platform with authentication, a REST API, and an admin dashboard. Strong problem-solver and fast learner, seeking an entry-level Full Stack or Android Developer role.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, Kotlin, C++, C
- **Web Development:** React.js, Node.js, Express.js, REST APIs, JWT Authentication, HTML5, CSS3
- **Mobile Development:** Kotlin, Android Studio (end-to-end Android app development)
- **Databases & Backend:** Firebase (Realtime Database, Authentication, Cloud Messaging),MongoDB (Mongoose, MongoDB Atlas)
- **Tools & Other:** Git, IR sensors & embedded circuitry, cybersecurity fundamentals
- **Soft Skills:** Problem-Solving, Time Management, Teamwork & Collaboration, Fast Learner

ACADEMIC PROJECTS

Never Alone — Final Year Project

Android Safety Application | Kotlin, Android Studio, Firebase, IoT Hardware

- Developed a complete Android safety application, covering UI design, architecture, development, testing, and deployment.
- Implemented live location tracking, SOS alerts, and push notifications for trusted contacts.
- Integrated Firebase Authentication, Realtime Database, and Cloud Messaging for secure real-time data synchronization.
- Integrated IoT hardware to extend the application's safety features beyond the smartphone.

ShopSphere — Full-Stack E-Commerce Platform

Personal Project | React.js, Node.js, Express.js, MongoDB, JWT

- Built and deployed a full-stack e-commerce platform covering frontend, backend, database, and deployment.
- Implemented JWT authentication, bcrypt password hashing, role-based access control, and RESTful CRUD APIs.
- Developed a responsive React storefront with search, filtering, sorting, cart, multi-step checkout, and order history.
- Built an admin dashboard for sales analytics and product, order, and user management.
- Deployed the application and published source code and documentation on GitHub.

Live Demo: shop-sphere-4v8e.vercel.app

Smart Stick for Blind Persons

Assistive Hardware Device | IR Sensors, Buzzer, Custom Circuitry

- Designed and built an assistive device for detecting nearby obstacles.
- Integrated IR sensors with custom circuitry to detect obstacles within a defined range.
- Implemented real-time audio alerts through a buzzer to notify users of nearby obstacles.

EDUCATION

Bachelor of Science in Computer Science

Fazaia College of Education for Women (affiliated with Air University, Islamabad)

Completed 2026 | CGPA: 3.64 / 4.00

CERTIFICATIONS

- Introduction to Cybersecurity
- Cyber Threat Management
