AYESHA KHALIQ

Full Stack Web Developer | Android Developer
ayeshakhaliq265@gmail.com | (+92) 3344921050 | LinkedIn

SUMMARY

Computer Science graduate (BS, 2026) with hands-on experience building Full-stack web applications and native Android apps end-to-end, from design and development through testing and deployment. Proficient in React.js, Node.js, Express.js, and Kotlin, with practical exposure to Firebase and MongoDB. Delivered a complete Android application independently for a final year project, integrating real-time data, authentication, and location-based alerts. Strong problem-solver and fast learner, seeking an entry-level Full Stack or Android Developer role to contribute technical skills and continue growing as a software engineer.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, Kotlin, C++, C
- **Web Development:** React.js, Node.js, Express.js, HTML5, CSS3, JavaScript
- **Mobile Development:** Kotlin, Android Studio (end-to-end Android app development)
- **Databases & Backend:** Firebase (Realtime Database, Authentication, Cloud Messaging),MongoDB
- **Tools & Other:** Git, IR sensors & embedded circuitry, cybersecurity fundamentals
- **Soft Skills:** Problem-Solving, Time Management, Teamwork & Collaboration, Fast Learner

ACADEMIC PROJECTS

Never Alone — Final Year Project

Android Safety Application | Kotlin, Android Studio, Firebase, IoT Hardware

- Designed and built a complete Android safety application independently, from architecture and UI design to coding, testing, and deployment.
- Implemented live location tracking, SOS alerts, and instant push notifications to trusted contacts, enabling faster emergency response.
- Integrated Firebase Realtime Database, Authentication, and Cloud Messaging to support secure, real-time data synchronization across the app.
- Combined the mobile application with IoT hardware components to extend safety features beyond the phone.

Smart Stick for Blind Persons

Assistive Hardware Device | IR Sensors, Buzzer, Custom Circuitry

- Designed and built an assistive navigation device to help visually impaired individuals detect nearby obstacles.
- Integrated IR sensors to detect obstacles within a set range and trigger proximity-based alerts.
- Built custom circuitry connecting sensors to a buzzer, providing real-time audio feedback to the user.

EDUCATION

Bachelor of Science in Computer Science

Fazaia College of Education for Women (affiliated with Air University, Islamabad)
Completed 2026 | CGPA: 3.64 / 4.00

CERTIFICATIONS

- Introduction to Cybersecurity
- Cyber Threat Management
